

STORAGE CAPACITY

The logistic system of CLH has a storage capacity of more than 7,7 millions of cbm, distributed in 40 storage facilities and 28 airport facilities. The breakdown by product is as follows:

- Unleaded petrol: 1,1 millions of cbm
- Diesel: 5,2 millions of cbm
- Aviation kerosene: 1,1 millions of cbm
- Fuel and IFOs: 0,3 millions of cbm

This breakdown varies depending on costumer's demand.

Below it is shown the storage capacities of each facilities:

There is available capacity.

There is not available capacity. On-demand capacity increasing is possible.

NOTES:

- The storage capacity of unleaded petrol includes bioethanol, diesel capacity includes biofuel and HVO and Kerosene capacity includes de aviation gasoline
- The storage capacity of other facilities is used to provide the service in some airports.
- The distribution of Gasoline, Diesel and Jet within each Terminal may vary
